📞 +84 988 942 804

Summary

Senior Fullstack Developer with 8+ years of experience delivering scalable, cloud-native platforms across fintech, edtech, and automation sectors. Proven record of leading cross-functional teams (up to 25 people), designing microservice systems, and driving 22+ project deliveries with 66% average gross margin. Core strengths include JavaScript/TypeScript (React, Node), cloud infrastructure (AWS, GCP), and DevOps automation.

Experience

Fullstack Developer at Hexabase Inc

Remote | Full-time

2023 - 2025

Develop and implement projects, ensuring high-quality and efficient code. Write test code to maintain system stability and reliability. Research and explore new technologies to enhance project performance and optimize development processes

Fullstack Developer/Team Leader at ReactPlus

Hanoi, VN | Full-time

2018 - 2023

Led and managed a team of 25 members to achieve project goals and objectives

- Mentored and coached team members to enhance their skills
- Delivered projects with a strong profit margin, maintaining operational costs at ~33% of revenue across 22 projects — above industry average for service-based teams

Fullstack Developer at SphinxSoftware

Hanoi, VN | Full-time

2015 - 2018

Projects

StudioOne

Marketing platform for automating Instagram comment replies. Users can create rules and templates to automatically respond to comments, while the platform manages subscriptions and payments for access to these features

Technologies: Node.js, NextJS, MySQL, AWS (Lambda, SQS, ECS), Stripe, MetaBusiness, InstagramAPIs

TokyoMarine flood forecasting

This project focuses on flood forecasting for Tokyo over the next 10, 25, and 50 years. It analyzes rising sea levels and predicts potential flood scenarios. Additionally, it assesses the damage risk to key assets such as buildings, public offices, and administrative areas based on sea level rise data. The goal is to provide accurate insights for urban planning and disaster prevention

Technologies: React, Redux, NodeJS (ExpressJS), AWS, MySQL, Ruby

Goalbased

This project is a comprehensive financial planning system designed to help users manage their finances and make informed decisions. By analyzing customer income, insurance policies, loan profiles, and real estate assets, the system provides personalized financial assessments and develops long-term financial plans. It offers tailored recommendations for spending, shopping, saving, and retirement planning

Technologies: ReactJS, NodeJS (NestJS), Docker, MySQL

Swimrecord

Official swimming competition records portal recognized by the Japan Swimming Federation. It serves as a centralized platform for tracking swimming tournaments, athlete profiles, personal achievements, and official records

Technologies: ReactJS, Redux, ReChart, Firebase

 <https://result.swim.or.jp/>

PhotoAC

This project aims to renovate a series of portfolio websites, namely PhotoAC, IllustAC, SilhouetteAC, for users to upload, download, and purchase photos

Technologies: NodeJS, AWS (S3, Lambda), Serverless, ReactJS, Redux
